

ROTARY PERCUSSION SYSTEM™

Terelion manufactures and services application specific drilling tools for the Mining and Construction industries. Our proprietary design capabilities, efficient manufacturing, and global sales force uniquely positions us to provide reliable drilling solutions faster than anyone else. We are a customer focused company with an innovative team conducting business in a responsible manner and a passion to win.

RPS TOOLS SERIES
FOR MINING APPLICATIONS

ROTARY PERCUSSION SYSTEM™

ADD SOME RPS TO YOUR ROP.

The patented RPS Rotary Percussion System combines the best advantages of rotary drilling and percussive drilling. The rotary cutting action combined with a percussive element allows for formations to fracture more easily. Thereby, RPS can drill efficiently in most formations whether hard or soft which leads to improved penetration rates and reduced drilling costs. The plug and play design makes it easy to fit the RPS system on your existing rotary drills.

Product Range in RP Bits

DIAMETER		SOFT TO MEDIUM			MEDIUM TO HARD		HARD TO VERY HARD		PIN SIZE	APPROX. WEIGHT	
in	mm	→			→		→		Inches	lbs	kg
6.75	171		RP43	RP50		RP60			3 1/2	46	21
7.875	200		RP43				RP70		4 1/2	76	35
9	229	RP35	RP40	RP43	RP53				4 1/2	96	43
9.875	251	RP35		RP53	RP60		RP67		6 5/8	145	66
10.625	270		RP40	RP53		RP63			6 5/8	157	72
12.25	311		RP53	RP60	RP63	RP67			6 5/8	225	102

AV/AVL products can be modified to run under RPS by special request. Your Terelion representative can assist you in selecting the proper bits to suit your application and maximize your productivity. The availability of specific products may change from time to time.

PLUG AND PLAY The Plug and play design to fit on your existing rotary drills effectively makes the RPS a broad application tool for the blast hole market. RPS will operate efficiently on any air rotary drill rig with 80-105 psi available.

UTILIZE PERCUSSION ENERGY Combining percussive energy with a rotary action allows formations to fracture more easily which in turn leads to increased drilling penetration rates.

VERSATILE IN ALL FORMATIONS The combined RPS action also drills without problem in consolidated or broken formations and transitional hard or soft formation changes. The system works as a rotary drill bit when a percussive action is not possible, such as when encountering groundwater.

OPTIMIZED RP DRILL BITS A high quality, energy focused bit is necessary to ensure the best drilling results possible. The RP bit series is designed specifically for use with the RPS tool to maximize ROP and minimize TDC. Switching out bits is easy – all RPS tools are built with API bit connections.

RPS62

TOOL WEIGHT		TOOL DIAMETER		TOOL LENGTH		BIT SIZE	
kg	lb	mm	inch	mm	inch	mm	inch
170	374	159	6 ¼"	1245	49	200 - 216	7 ⅞" - 8 ½"
